

The NATIONAL YOUTH SCIENCE CAMP is an honors program for two high achieving high school students from each state in the nation and others from around the world. This residential summer experience is held in a rustic setting in West Virginia's eastern mountains and has honored and challenged more than 5,000 participants since it began in 1963.

Two high school seniors will receive a *full scholarship* to exchange ideas with scientists and other professionals from the academic and corporate worlds. The nearly month-long experience includes lectures and hands-on research projects presented by scientists from across the nation; overnight camping trips into the Monongahela National Forest; and a visit to Washington D.C. The selected delegates must not only demonstrate academic achievement in science, but also show potential for thoughtful scientific leadership.

***The NYSC experience is offered at no cost to its participants***, so that selected delegates may attend regardless of their financial status. Contributions to the National Youth Science Foundation® allow delegates to participate in this "once in a lifetime" experience. Educational and recreational programming, as well as meals, lodging, and round-trip air passage on scheduled airlines are provided free of charge.

Delegates arrive in Charleston, West Virginia, on Friday, June 27, and depart on Sunday, July 20, 2014. The NYSC is held near Bartow in the eastern mountains of West Virginia, within the Monongahela National Forest.

**Applications must be submitted by Friday, March 1, 2014.**
